

WADA ABERA CHALA

Full-Stack Developer | React, Node.js & NestJS Specialist

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building complete, production-style applications end to end — from React front ends to NestJS/Node.js APIs backed by PostgreSQL and MongoDB. Delivered the entire backend for a B2B e-commerce platform during a paid internship, including secure OTP-based authentication, and independently built full-stack real estate/rental and e-commerce platforms integrating React with Express, PostgreSQL, and MongoDB. Comfortable owning a feature from UI to database schema, with a strong focus on secure API design, clean architecture, responsive interfaces, and scalable systems. Actively deepening skills in Java, Prisma, and AWS to support production-grade, cloud-deployed platforms.

PROFESSIONAL EXPERIENCE

Backend Developer — Paid Internship | Andropia PLC

3 Months • Remote

- Built the complete backend for a scalable B2B e-commerce platform using NestJS, PostgreSQL, Docker, Redis, and CI/CD.
- Designed and implemented a secure authentication module with OTP-based verification.
- Structured the API for order management and multi-role B2B workflows, with the frontend developed in parallel by a separate team (in progress).
» **Live Backend:** <https://b2b-ecommerce-web-appv1-auth-module-1.onrender.com>

Backend Developer — Internship | Debo Engineering PLC

4 Months • Remote

- Built the backend for the Ethio Local Business & Diaspora Platform using NestJS and MongoDB, connecting Ethiopian diaspora members with local businesses for collaboration.
- Designed data models and APIs to support business listings, matchmaking, and cross-border collaboration features.
» **Live Project:** <https://businessman-diaspora-platform-7.onrender.com>

Backend Developer — Certificate Project | Ya'i Software PLC Technology

3 Months • Remote • Awarded Advanced Backend Development Certificate

- Built Chella Reward API, a modular rewards platform API using NestJS, PostgreSQL, Docker, and CI/CD.
- Implemented JWT authentication, role-based access control, and real-time updates via WebSockets.
» **Live Demo:** <https://chella-gram.vercel.app/>
» **API (Backend):** <https://chelle-api-1.onrender.com>

Web Development Intern | Prodolity

1 Month • Remote

- Completed a web development internship covering front-to-back workflows, contributing to features spanning UI implementation and API integration.
- Collaborated with a remote team following Agile practices, version control, and code review conventions.

KEY PROJECTS

★ Dawolif's — Real Estate, House & Car Rental Platform | React, Express, PostgreSQL

- Built a full-stack rental marketplace where users can browse, list, and book real estate properties, houses, and cars, with search/filtering and booking management.
- Developed a React front end consuming a RESTful Express API, with a PostgreSQL schema modeling listings, bookings, and users.

★ E-Commerce Website | React, Express, MongoDB

- Developed a full-stack e-commerce platform with product catalog, cart, and checkout flow, plus a React storefront UI.
- Built the Express/MongoDB backend for product, order, and user management, and integrated it with the React frontend via REST APIs.

★ Baby Vaccination Management System | React, NestJS, PostgreSQL

- Built a full-stack platform with a parent portal and clinic dashboard, including automated reminders and chart-based vaccination data visualization.

★ Job Portal | React, Node.js, PostgreSQL

- Developed a job search and application platform with a React frontend, a secure Node.js backend, and a PostgreSQL database.

TECHNICAL SKILLS

Languages

- JavaScript / TypeScript
- Java
- Python

Frontend

- React.js (Hooks, Context API)
- HTML5, CSS3, Tailwind CSS
- Responsive / Mobile-First UI
- REST API Integration (Axios/Fetch)
- Component-Based Architecture

Backend

- Node.js, NestJS, Express.js
- REST API Design
- JWT Auth & OTP Verification
- WebSockets (real-time)
- Role-Based Access Control

Databases

- PostgreSQL
- MongoDB
- MySQL

DevOps & Cloud

- Docker
- CI/CD (GitHub Actions)
- Redis
- AWS (building hands-on skills)
- Render, Vercel, Netlify

Tools

- Git & GitHub
- Postman
- Figma (UI handoff)
- Agile / Team Collaboration

CERTIFICATIONS

Advanced Backend Development

Ya'i Software PLC Technology

Web Development Internship

Prodolity

★ Car Parking & Washing Management System | Java, MySQL

- ▶ Designed a relational database and backend logic in Java to manage parking slots, washing service bookings, and billing.

★ Fruit & Vegetable Classifier | Python, CNN, Transfer Learning

- ▶ Built a real-time image classification app achieving 95% accuracy using a convolutional neural network.
» **Live Demo:** <https://wadabera-deep-learning-project-vegetable-fruitident-app-fzysjo.streamlit.app/>

OTHER PROJECTS

- ▶ Restaurant / Café Management System — React, Node.js, MongoDB
- ▶ Student SRS Management System — Role-based access, dynamic document generation
- ▶ To-Do List App — React — <https://to-do-list-wada.netlify.app/>

EDUCATION

B.Sc. Software Engineering

Jimma University

2025 – 2029 (*In Progress*)

LANGUAGES

- ▶ English — Advanced
- ▶ Amharic — Native
- ▶ Oromo — Native
